Axis 1: Controlling and **programming biological living matter**.

Axis 2: **Emergence of spatial and temporal organization** in living matter.

Axis 3: **Information processing** and dynamics of biological active matter.

Axis 4: **Driving evolution** within living systems.

## Expertise and questions of interest:

- Protein evolution and design
- Physics of catalysis and allostery
- Role of genetic context in gene transcription
- Information processing & adaptation in evolution
- Models for the origin of life

See <https://statbio.net/>

Coevolution in proteins

Directed evolution

Gene regulation

Information processing

Models for the origin of life
